

## Exploring the location, use, storage and movement of water

On your mark, get set, flow! Drink in the 2017/2018 HYDRO DYNAMICS<sup>SM</sup> season and learn all about water – how we find, transport, use, or dispose of it. In the 2017/18 FIRST® LEGO® League Challenge, students age 9 to 16 from 80 countries will make a splash with HYDRO DYNAMICS<sup>SM</sup>. What might become possible when we understand what happens to our water?

FIRST® LEGO® League challenges kids to think like scientists and engineers. During the HYDRO DYNAMICS<sup>SM</sup> season, teams will choose and solve a real-world problem in the Project. They will also build, test, and program an autonomous robot using LEGO® MINDSTORMS® technology to solve a set of missions in the Robot Game. Throughout their experience, teams will operate under the FIRST® LEGO® League signature set of Core Values, celebrating discovery, teamwork, and Gracious Professionalism®.

\*AGES VARY BY COUNTRY

## Each year FIRST LEGO League teams will:

- Build, test and program an autonomous robot using a LEGO MINDSTORM® kit
- Choose and solve a real-world problem in the project
- Operate under the FLL signature set of Core Values

FLL is an exciting alliance between FIRST® and the LEGO Group
